## **DETAILED ACTION**

This office action is in response to applicant's Arguments and remarks filed October 07, 2010.

### ***Response to Arguments***

1. The Rejection under 35 USC 103(c) with respect to claims 12, 19, 21, and 23 is withdrawn based on Examiner's Amendment and the Applicant's argument with respect to rejected claim 21.

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with I. Zborovsky, Reg. No. 28563 on October 25, 2010. The applicant representative, I. Zborovsky agreed to the following changes without prejudice. (See the attached supplemental Amendment that has been sent by fax to Examiner on October 25, 2010, page 1-6).

**The amendment as the following:**

**Claims 20 and 22 are cancelled.**

**Claim 12.** A discussion unit ~~for use~~ in a conference system and connectable to at least one second discussion element of the conference system, said discussion unit comprising means for switching between at least two operating modes; at least one exchangeable control out of a set of controls including at least one control for each of the operating modes, said at least one exchangeable control being configured to indicate to a user an operating mode currently used and to allow the user to control the discussion unit; a casing; and a configuration switch for configuring the discussion unit to operate in one of the operating modes, wherein the configuration switch is accessible only when the casing is in a disassembled state ~~and; and an ejector facility including at least one opening which allows for a user to push said at least one exchangeable control out of said casing.”~~

**Claim 21.** An ejector tool to be used for a discussion unit ~~for use~~ in a conference system and connectable to at least one second discussion element of the conference system, said discussion unit comprising means for switching between at least two operating modes, at least one exchangeable control out of a set of controls including at least one control for each of the operating modes, said at least one exchangeable control being configured to indicate to a user an operating mode currently used and to allow the user to control the discussion unit, with a casing, wherein the ejector tool has a tool element configured with two parallel arms for pushing a pair of pins comprising the at least one exchangeable control, which pair of pins are inserted in ejector openings within the casing, in order to eject and remove the at least one exchangeable control from the casing.”

**Claim 23.** A conference system, comprising at least two discussion units each provided ~~for use~~ in a conference system and connectable with one another, wherein each of said discussion units includes means for switching between at least two operating modes, at least one exchangeable control out of a set of controls including at least one control for each of the operating modes, said at least one exchangeable

control being configured to indicate to a user an operating mode currently used and to allow the user to control the discussion unit, and at least one additional exchangeable control out of the set of controls and including at least one control for each of the operating modes, wherein the at least one additional exchangeable control is adapted to indicate to a user an operated mode currently used and to allow for the user to control the discussion unit; a casing; and a configuration switch for configuring the discussion unit to operate in one of the operating modes, wherein the configuration switch is accessible only when the casing is in a disassembled state; and an ejector facility including at least one opening which allows for a user to push said at least one exchangeable control out of said casing."

***Allowable Subject Matter***

2. Claims 12-19, 21, and 23 are allowed.

***Reasons for Allowance***

The following is an examiner's statement of reason for allowance:

The prior art specifically Woods et al (Pub. No. US 2005/0271194 A1), Meyerson et al (Pub. No.: US 2003/0118175 A1; hereinafter Meyerson), Owen (Pub. No.: US 2004/0073500 A1) and Kusano (Pub. No.: US 2005/0022621 A1) and Daily et al (Pub. No.: US 2005/0257369 A1; hereinafter Daily) failed to render obviousness in combination or individually, and failed to anticipate individually the following limitations:

“a discussion unit comprising an ejector facility including at least one opening which allows for a user to push said at least one exchangeable control out of said casing.” as disclosed in independent claims 12 and 23; and “wherein the ejector tool has a tool element configured with two parallel arms for pushing a pair of pins comprising the at least one exchangeable control, which pair of pins are inserted in ejector openings within the casing, in order to eject and remove the at least one exchangeable control from the casing.” as disclosed in independent claim 21.

Moreover, the invention discloses a multi-functional discussion unit that comprise an ejector facility have two ejector opening, cylindrical holes in the backside of the casing, which are located within a push-button, the push-button comprises pins which are adapted to match with the ejector opening and also adapted to match with an ejector tool that has two parallel arms suited for being pushed through the ejector openings from the backside of the casing in order to push the pins of the push-button out of the ejector opening for the purpose of replacing buttons by a user for design change. In addition, Applicant's arguments and remarks, in page 12, states “while Daily may disclose an electronic component extractor tool 10, Daily's Fig. 1 and paragraphs [0008], [0011] and [0022], describe tool 10 as comprising opposing deflectable arms 12, 14, with substantially identical ends 20 having ledges 22, 24 (Fig. 2) to catch side edges of electronic components. When pushed together, arms 12, 14 are not parallel. But perhaps more importantly, **Daily's tool 10 and arms 12, 14 with ledges 22, 24 are for grasping and contacting, not for pushing out a pair of pins, as claimed.**” [Emphasize added]. For all the above reasons, **independent claims 12, 21, and 23 are allowed. Claims 13-19 are depended of independent claim 12; therefore, claims 13-19 are allowed for their dependency from independent claim 12.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
